EXPOCENTRE
 INTERNATIONAL EXHIBITIONS AND CONVENTIONS
 MOSCOW

We are proud that Russia is a major energy power of the world. We possess substantial energy resources and extensive refining and transportation infrastructure. And it is our goal to use these assets wisely for the benefit of the Russian citizens, the economic and social development and the strengthening of the export potential of our nation.

The fuel and energy sector of the future is a high-tech industry, in the first turn. Production and refining processes must be based on modern hardware and latest technologies, including energy efficient and energy saving methods.

Vladimir Putin

President of the Russian Federation

(An extract from the speech at the first meeting of the Presidential Commission on the Fuel and Energy Sector Development Strategy and Environmental Safety)

KEYNOTE INTERNATIONAL EVENT OF THE ENERGY INDUSTRY

The 15th International NEFTEGAZ Exhibition and the 23rd International ELEKTRO Exhibition will be held at Expocentre Fairgrounds on May 26–29, 2014. Manufacturers and consumers of oil, gas and electrical hardware will meet under the same roof for the first time ever.

The exhibitions, NEFTEGAZ'2014 and ELEKTRO'2014, are an essential and integral part of the development of the Russian fuel and energy sector. The history of the exhibitions dates back to the 1970s (NEFTEGAZ was established in 1978 and ELEKTRO in 1972), a period of swift development of Soviet electric power, oil and gas industries.

The exhibitions remain influential in the eyes of the authorities and the professional community under the new economic conditions as a symbol of the contemporary Russian fuel and energy sector.

The simultaneous holding of the two leading sectoral shows will bring a tangible synergetic effect consistent with the global trend of unification of branches of the fuel and energy sector. It will also draw exhibitors from allied industries, optimize their expenses and increase the return on investment (ROI) ratio.

NEFTEGAZ'2014 / ELEKTRO'2014 is the combined international floor for interaction between the authorities, public associations of the sector, business and the scientific community based on the direct partnership and aimed at the accomplishment of the strategic mission – economic modernization and innovative development of the fuel and energy sector.

LEADING EXHIBITIONS OF RUSSIAN FUEL AND ENERGY SECTOR

NEFTEGAZ'2014 and ELEKTRO'2014 are exhibitions bound to reflect progress on the fulfillment of the Russian Energy Strategy for the period up to 2030.

The Russian Energy Strategy for the period up to 2030 has the following targets

- Transition to the innovative and energy efficient development;
- Adjustment of the structure and scale of energy production;
- Creation of a competitive market environment;
- Integration with the global energy system.

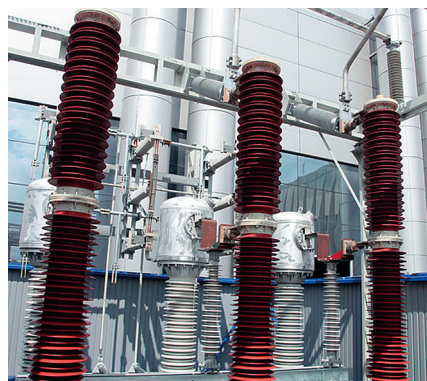

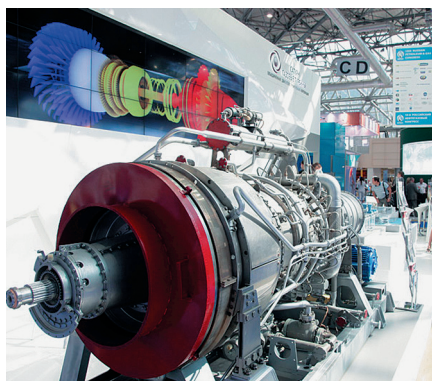

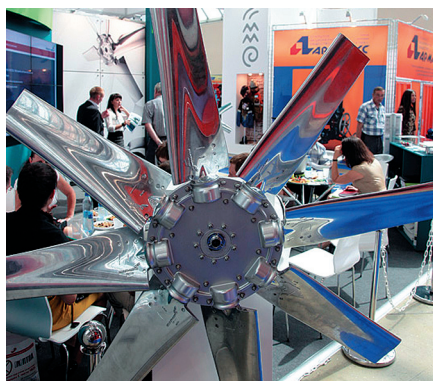

The exhibitions will put an emphasis on further development of the Unified Energy System of Russia, the innovations potential of the fuel and energy sector, and newest technologies available in the industry.

The leading sectoral exhibitions, which display the development of major branches of the Russian economy, enjoy constant support from the national administration, the Russian Federal Assembly, the Russian Government, ministries and departments.

A cooperation agreement between the Federation Council of the Russian Federal Assembly and the Chamber of Commerce and Industry of Russia states that NEFTEGAZ and ELEKTRO exhibitions, as professional events of the leading industries, which determine the socioeconomic situation in the country to a large extent, are held under the patronage of the upper house of the Russian Federal Assembly.

Chairperson of the Federation Council of the Russian Federal Assembly V.I. Matvienko and Chamber of Commerce and Industry of Russia President S.N. Katyrin (April 3, 2013, CCI of Russia)

15th International Exhibition NEFTEGAZ

May 26–29, 2014

Equipment and Technologies for the Oil and Gas Industries

- Held since 1978
- Total exhibition space 61,420 square meters
- 976 exhibitors from 32 countries
- 31,000 visits from specialists

Acclaimed as the biggest exhibition in Russia in the field of oil and gas in 2012 in the Exhibition Space, International Recognition, Market Coverage Nominations (by an independent exhibition audit)

THEMATIC SECTORS

- Research, exploration, development and operation of oil and gas deposits
- Onshore and offshore oil and gas well construction
- Transportation and storage
- Equipment and technologies
- Oil and gas processing and petrochemical industry
- Ecology, modern systems of environmental monitoring
- Labor protection and safety systems

We are closely monitoring transformations of the global energy market, including alternations in the energy balance, infrastructure, supply routes and technological development of the industry. Our policy is based on the principles of realism, openness and the need for integration with the global energy sector; therefore, decisions concerning the development vector of the oil and gas sector are made with due account for the main perspective markets and technological prospects. We are open to joint work and will promote labor and scientific integration of the Russian oil and gas sector with the global industry.

Alexander Novak
Russian Energy Minister

(An extract from the Geopolitical Transformations in the Context of the U.S. Oil and Gas Revolution Report at the 49th Munich Security Conference)

FROM MODERN OIL AND GAS TECHNOLOGIES TO SUSTAINABLE DEVELOPMENT OF THE INDUSTRY!

Organized by the Chamber of Commerce and Industry of Russia, Expocentre ZAO; supported by the Russian Ministry of Natural Resources and Environment, Russian Ministry of Energy, Russian State Duma Committee on Natural Resources, Environmental Management and Ecology, Russian State Duma Committee on Energy, and industry unions and associations.

More than 1,000 delegates from 30 countries
Representatives of the Russian Presidential Administration, the Russian Government, the State Duma of the Russian Federal Assembly, heads of ministries and departments, regional authorities, heads and specialists of leading Russian and foreign fuel and energy companies, public organizations of the industry, research and production centers.

5TH EDITION OF THE INTERNATIONAL FORUM

ENERCON

TOPICAL ISSUES
OF INNOVATIVE DEVELOPMENT
IN THE OIL AND GAS INDUSTRY

May 26–28

www.enercon-ng.ru

FORUM SUBJECTS

- The age of shale gas and oil. Production of hard-to-recover reserves
- Advanced recovery methods and energy efficiency of oil production
- Russia's resource potential: conventional, nonconventional, alternative sources
- Policy of major companies coupled with global experience
- Hydrocarbon resources and reserves in the Caspian Sea
- Prospects of Arctic shelf development
- Development trends of the global petrochemical industry

The Russian Oil and Gas Union invariably supports the holding of the International ENERCON Conference sessions dedicated to pressing issues of the innovative development of the oil and gas sector.

I am confident that conference events will be meaningful for specialists, create a favorable environment for the fruitful communication between the authorities, business and scientists and be very efficient and productive.

Gennady Shmal
Russian Oil and Gas Union President

ELEKTRO

23RD INTERNATIONAL EXHIBITION FOR ELECTRICAL EQUIPMENT FOR POWER AND ELECTRICAL ENGINEERING, AUTOMATION, LIGHTING ENGINEERING

26–29
May 2014

www.elektro-expo.ru

- Held since 1972
- Total exhibition space 28,079 square meters
- 458 exhibitors from 25 countries
- Six national pavilions
- 18,650 visits from specialists

Acclaimed as the best exhibition in Russia in the field of electric power engineering in 2012 (by an independent exhibition audit)

ELEKTRO covers all segments and current trends of the industry and hosts a rendezvous of electric power industry companies, producers and sellers of electrical engineering and cable products, distributors and consumers on the same floor.

THEMATIC SECTORS

- Electric power engineering
- Electric equipment
- Commercial lighting engineering
- Building automation systems
- Cables, wires, fittings
- Energy savings and innovations

Hardware and technologies are not the only dimensions of the modern electric power industry. Promotion of modern solutions can be successful only with the legislative support of such initiatives, and the Energy Committee of the State Duma of the Russian Federal Assembly will play the most active part in the discussion of every topical aspect of the electric power industry.

*Ivan Grachyov
Chairman of the Energy Committee of the State Duma
of the Russian Federal Assembly*

(An extract from the greeting to Journal “ELEKTROENERGIYA. Peredacha i raspredelenie” (ENERGY: Supply and distribution), No.1 (10) January–February, 2012)

ELEKTRO – FROM ELECTRIC POWER GENERATION TO END USER

SCHEDULE OF EVENTS

- International Conference on Renewable and Small-Power Energy
- Business Dialogue ‘SMART CITY. Solutions for Megapolises’
- Russian Business Forum ‘Electrical Engineering: Business Strategy’
- Seminar and meeting of CEOs of power grid companies ‘Necessary Changes to the Regulations of Technological Connections’

In 2013 national pavilions of the exhibition were organized with support from

- Czech Ministry of Industry and Trade
- Slovak Economy and Construction Ministry
- Assocham Association of Chambers of Commerce and Industry of India
- CCPIT China Council for Promotion of International Trade
- AFME Spanish Association of Producers of Electrical Materials
- ZVEI German Electrotechnical Union

ELECTROPARK

Pursuant to Federal Law No. 261-FZ on *the Improvement of Energy Efficiency of Industrial Facilities and Energy Saving at Enterprises*, a special exposition, ELECTROPARK, will be deployed. The aim of the project is to focus the attention of exhibition visitors on innovative products raising the energy efficiency of buildings or equipment and elaborate recommendations for introduction of energy saving technologies.

Russian electric power companies are eager to develop partnership with foreign colleagues and exchange experience and technologies for the sake of technological and innovative development of the industry.

*Alexander Maslov
President of the PROGRESSELECTRO
Association of Power Supply to Russian Cities*

Dear colleagues,

Let me invite you to the biggest fuel and energy exhibitions in Russia, the 15th NEFTEGAZ and 23rd ELEKTRO International Exhibitions. I am confident that these exhibitions will become landmark events for the professional communities of manufacturers and consumers of oil, gas and electrical hardware.

Expocentre is an internationally acclaimed exhibition company of Russia, which has invariably retained the status of a leading organizer of the biggest international sectoral shows in Russia, the CIS and Eastern Europe. Expocentre will mark its 55th anniversary in 2014.

Expocentre hosts major industrial exhibitions of the country related to the primary development areas and strategic tasks of the national economy.

It is our mission to provide a range of quality services to exhibitors and visitors of the exhibitions, which will help them to achieve their primary objectives: planning of business meetings, search for partners, market analysis, conclusion of trade deals, signing of cooperation agreements and fostering the authority of companies and departments.

Expocentre presents nine exhibition pavilions with the best available engineering and technological infrastructure and convenient multirole halls for conventions, press conferences, symposia and seminars.

All the Expocentre exhibitions enjoy support from federal executive authorities and national industry associations. Most of the exhibitions are held under the patronage of the Chamber of Commerce and Industry of Russia and the Moscow Government.

See you at Expocentre!

Sergey Bednov
Chairman of the CCI of Russia Committee on Conventions
and Exhibitions and Support to Manufacturers and Exporters,
Expocentre General Director
